DETAILED ACTION

Response to Amendment

The reply filed on 3/2/04 is not fully responsive to the prior Office Action because of the following matter(s): If, after an office action on an application, the applicant presents claims directed to an invention distinct from and independent of the invention previously claimed, the applicant will be required to restrict the claims to the invention previously claimed if the amendment is entered, subject to reconsideration and review.

Amended claims submitted on 3/2/04 are directed to an invention that is independent or distinct from the invention previously claimed for the following reasons:

Previously presented claims are drawn to monitoring and managing the performance of existing power generating assets.

Amended claims submitted 3/2/04 are drawn to recommending a power generating facility to a business entity.

Therefore, the scope covered by the amended claims is directed to business practice and analysis completely different from the previously presented claims that were directed to a performance computer-based system/method.

Because the amended claims are directed to an invention distinct from and independent of the invention previously claimed these inventions have acquired a separate status in the art and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the previously presented invention, this invention has been constructively elected by original presentation for prosecution

on the merits. Accordingly, amended claims submitted 3/2/04 are withdrawn from consideration as being directed to a non-elected invention. See MPEP § 821.03.

Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
